Student Journal: Grebe Breeding Behavior- Raising Young

✓Nestlings
✓Fledglings

Nestlings can act out these chick rearing behaviors in class before the field trip. During the field trip, observe these chick rearing behaviors and record the total number of times observed. Fledglings can also record a description of their specific observations.

Chick Rearing Behavior	Total number of times observed	Description
Back brooding		
Free swimming		
Feeding attempts by adult		
Dives for food by adult		
Red skin patch on chicks head observed during begging		
Chicks competing for food		
Predator avoidance
